CORENTIUM HOME DIGITAL RADON DETECTOR

DEVELOPED IN NORWAY - HOME OF FRESH AIR

Quick results and no lab fees

The Corentium Home by Airthings provides exactly what you need to stay on top of your radon levels - no more, no less. The Home is a highly accurate device that is simple to use and easy to understand. Radon levels fluctuate daily, therefore short- and long-term measurements are necessary.

Quick results

Within 24 hours you will see the first indication of your radon levels; no need to send anything to a lab, ever. The LCD screen shows the long-term average for the last year (updated every 24 hours) and the short-term average over the last day (updated hourly) and the last week (updated every 24 hours.) As a bonus, simply enter your measurements online and receive a printable report sent to your inbox.

Long battery life

The 3 AAA batteries, which are included, last an incredible two years. Since the device is battery operated and portable, it is simple to gain an overview of radon levels in different rooms or buildings.

Portable

The Corentium Home is lightweight and portable making it easy to move to different rooms, floors or buildings. Airthings suggests long-term monitoring, however if you want to test a different space, remember to reset the unit.

Accuracy

The device automatically calibrates to its environment, improving accuracy. Traditional methods provide one result over a single period of time, while the Corentium Home includes both short- and long-term averages. Keep track of your radon levels day-to-day or see the average over a week or year, providing you with peace of mind.

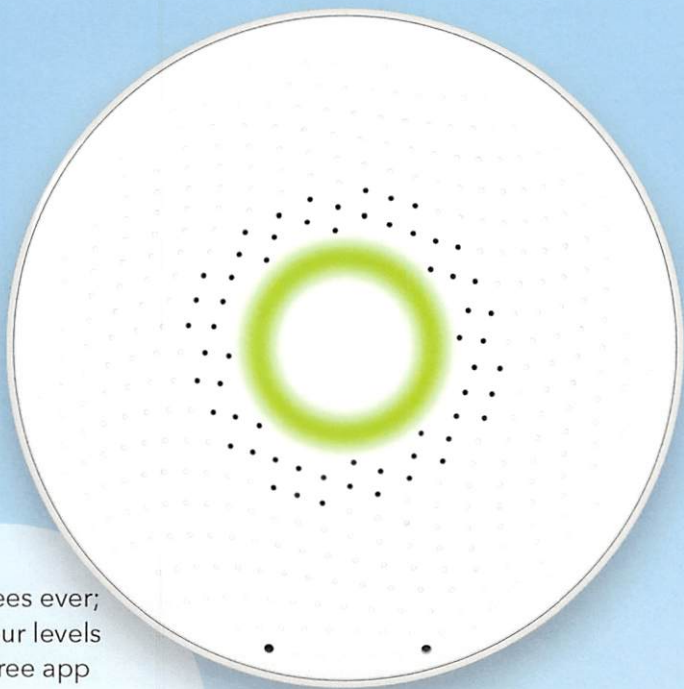

Product features

- Power supply: 3 AAA batteries with 2 year lifetime
- Dimensions: 4.7 x 2.7 x 1 inches
- Weight: 4.7 oz
- Operational Environment: 39° to 104° F, < 85 % relative humidity
- Measurement range: Lowest detection limit 0 pCi/L, upper display limit 500.0 pCi/L
- Measurement uncertainty: After 7 days, < 10% at 2.7 pCi/L, After 2 months, < 5% at 2.7 pCi/L

THE SMART RADON DETECTOR

DEVELOPED IN NORWAY - HOME OF FRESH AIR

More than a Radon Detector

Radon is the leading cause of lung cancer among non-smokers. Radon gas kills more than 6 times the amount of people than home fires and carbon monoxide poisoning combined. Radon gas can be found everywhere and fluctuates daily. Every home needs a radon detector.

Check your radon levels instantly

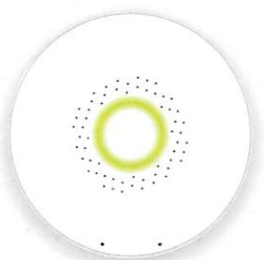

Airthings Wave will provide you with detailed information about radon, temperature and humidity levels right on your phone. View daily, weekly, monthly and yearly measurements in the app. Use the data to take the necessary steps to protect your home and loved ones from the dangers of radon gas.

Accessing your radon levels is necessary to minimize potential health effects. Know your levels by using the free mobile app or by simply waving your hand in front of the device to receive a color coded indication of your levels. These color codes are easy to understand, making it a device for all ages.

 Good  Warning  Danger

- Air quality: radon, temperature, humidity
- Motion sensor: wave
- Visual Alerts: green, yellow, red
- Free mobile app: iOS and Android
- Long battery-life: ~1.5 years
- Notifications: In app and email
- Access to Airthings Dashboard
- Radon sampling: Passive diffusion chamber
- Detection method: Alpha spectrometry
- Operational Environment: 39°F to 104°F
- Measurement range: 0 - 500 pCi/L
- Weight: 7.7 ounces (with batteries)
- Dimension: 4.7 inches (diameter), 1.4 inches (height)
